

# 1000MW Supercritical Coal-fired Power Plant at Tanjung Bin to be Delivered by Alstom

Tanjung Bin Energy Issuer Bhd has signed a contract worth over 1 billion euros with Alstom and its consortium partners to provide a 1000MW supercritical coal-fired power plant at Tanjung Bin, Johor. Besides supplying all key power generation equipment, Alstom will also be in charge of the overall engineering, project management and commissioning, and will execute the EPC (Engineering, Procurement and Construction) contract together with its consortium partners Mudajaya and Shin Eversendai. In addition, Alstom will engineer, supply, construct and commission the 1000MW supercritical steam turbine and generator, the supercritical boiler, power plant auxiliaries such as mills and air-preheaters as well as proprietary environmental control systems. The additional plant is to be commissioned in 2016.
