

1 'PLATINUM', 1 'DOUBLE GOLD' & 3 GOLD MEDALS FROM THE BRITISH INVENTION SHOWS 2010

UniMAP's Participation at the exhibition of international design and innovation 'British Invention Shows' started in 2008. This year once again UniMAP sent three research products to compete in the prestigious exhibition, from 13th to the 16th October 2010, at Alexandra Palace, Wood Green London. UniMAP staked a product by Prof. Dr. Uda Hashim and two more by Mr. Mohd Hafiz Fazalul Rahiman. The selection of these products is based on their success in national competitions since the beginning of the year. Hence, UniMAP had high hopes that all three products will be 100% successful and win medals in this exhibition.

The extensive research experience and high quality products for this competition resulted in UniMAP once again achieving success as our contestants won three gold medals from the exhibition. The Product by Prof. Dr. Uda Hashim won the 'Platinum' award, while one of the products manufactured by En. Mohd Fazalul Rahiman successfully won the 'Double Gold' awards.

Overall, this participation can be regarded as another string of great success at international levels reached by UniMAP's researches. Such achievements can directly increase the University's visibility in the international arena.

Researcher	Product Title	Award
Prof. Dr. Uda Hashim	Edge Transfer Lithography for Nano-electronic Application	Special Platinum award and Exhibition Gold
Mohd Hafiz Fazalul Rahiman	U100 Flow Imager	Special Double Gold award and Exhibition Gold
Mohd Hafiz Fazalul Rahiman	ENT426 CT Virtual Lab	Exhibition Gold
